I, the undersigned state/official veterinarian certify that:

The certificate is based on the following pre-export certificates (see attached list in case more than two)¹:

Date:	Number:	Country of origin:	Administrative territory:	Approval number of the Establishment:	Name and quantity (net weight) of the product:

- 4.1 Raw materials of animal origin, contained in product, are derived from clinically healthy animals in establishments, fulfilling the necessary veterinary-sanitary requirements and approved by the Competent Veterinary Service for supplying their production for export and operating under its constant supervision.
- 4.2 Raw materials of animal origin (meat and edible offal, fish and other marine products, egg products, milk and dairy products, honey, fats), contained in product, are confirmed by veterinary – sanitary inspection as fit for human consumption.
- 4.3 Beef and mutton from which the finished product is manufactured are derived from animals that originate from herds where there is no case of Bovine spongiform encephalopathy (BSE) or scrapie respectively and do not belong to birth cohorts of BSE positive animals, and:
² either [4.3.1. no classical BSE case in animals younger than 5 years has been detected in the Member State over the last 3 years. The meat is obtained from bovine animals which have been submitted to BSE test if they were older than 72 months at the time of slaughter, with negative result (applicable as from 6 July 2011);]
² or: [4.3.1. the meat is obtained from bovine animals which have been tested for BSE, with negative results, when they were over 48 months at slaughterhouse;]
² or: [4.3.1. the meat is obtained from bovine animals which have been tested for BSE, with negative results, when they were over 30 months at slaughterhouse.]
Specified risk materials (SRM) were removed according to the OIE Code recommendations.
- 4.4 Products were manufactured in an establishment which fulfils the necessary veterinary sanitary requirements and is approved by the Competent Veterinary Service in the EU for supplying their production for export and operating under its constant supervision.
- 4.5 Products originate from establishments or cold stores, in the administrative territory of the EU Member State free from the diseases appearing on list A in the OIE Code of 2003 and for which the species from which the product originates is susceptible, including³:
 - African swine fever within the last 3 years in the territory of the EU Member State excluding Sardinia;
 - rinderpest during the last 12 months and foot-and-mouth diseases during the last 6 months in the territory of the EU Member State.
- 4.6 The products are recognized fit for human consumption.
- 4.7 Microbiological, chemical-toxicological and radiological characteristics of the product correspond to actual veterinary and sanitary rules and requirements of the Russian Federation.
- 4.8 Products have identification marks.
- 4.9 Single-use containers and packaging material correspond to hygienic requirements.
- 4.10 Means of transport are treated and prepared in accordance with the rules approved in the EU.
